

# The RFX Companies

*Over Half a Century of Driving Quality Transportation Service Toward the Future*

To Whom It May Concern:

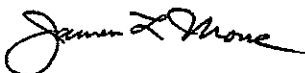

There was a major fire in our corporate office in October 2008. Fortunately, everyone got out in time and there were no injuries. But we lost 95% of everything that was in the office. At the suggestion of a business acquaintance, we hooked up with Swerling Milton Winnick and in hindsight, it was the best thing we could have done!

In less than an hour, someone was on sight helping us out and giving us much needed advice. There were several on-site inspections, inventories, and subsequent meetings with the insurance company and we were closely represented during the entire process.

I always thought I was pretty good with insurance matters, but if we tried doing it ourselves, I believe we would not have been able to recover half of what we did had it not been for Swerling Milton Winnick. They were very persistent and willing to fight on our behalf to ensure we received reasonable compensation for our losses. And, they followed through until the very end.

I can unreservedly recommend Swerling Milton Winnick to anyone in need of a talented, aggressive, and professional public insurance adjuster.

Sincerely,

James L. Morse  
President & CEO
